Telegram

Skills

TypeScript, React, Vue, Vite, Capacitor, JavaScript, HTML (Flexbox, Grid, animations), CSS (LESS/SCSS), PHP, WordPress, MySQL, Nuxt.js, Git, WebSockets.

Experience in years

Full website development (HTML, CSS, JS, PHP, WordPress) - 10 years.

React - 2 years.

Vue - 4 years.

Where did I work

Period: 2016 - 2020

Job title: Web developer

Place of work: Freelance

Stack: HTML5, CSS, JS, PHP, MySQL

What did I do:

I developed turnkey websites, creating responsive layouts from mockups (Figma, Photoshop, Adobe XD) into clean, cross-browser, and valid code.

I worked with SEO: setting up meta tags, microdata, and speeding up page load times.

I worked with CMS: I deployed the layout on the WordPress CMS, created templates and plugins.

I worked with backend: I wrote a full-fledged backend in PHP, including authorization, registration, shopping cart, etc.

Examples of work:

<https://lp.projumping.ru/>

<https://vfmauto.ru/>

<https://www.helloasia.ru/>

<https://arnkom.ru/>

<http://vakk.ru/>

Companies with whom I have collaborated and can confirm my experience:

<https://landingpages.by/>

<https://t-f-a.agency/>

Period: 2020 - 2023

Job title: Web Developer

Place of work: <https://ddma.me/>

Stack: React, Vue, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, REST API, Git

What did I do:

Developed web interfaces and components for websites and mobile applications.

Integrated APIs: connected the frontend with the backend via a REST API, processed responses, and displayed dynamic content.

Created websites based on CMS WordPress, integrated layout.

Teamwork: collaborated with designers and backend developers, managed tasks in Jira, and worked with Git.

Examples of work:

<https://formpit.ru/>

<http://nova-implant.ru/>

Period: 2023 - 2025

Job title: Frontend Developer

Place of work: <https://career.habr.com/companies/necasino>

Stack: Vue (Vue 3, Composition API, Pinia), Vite, TypeScript, HTML5, CSS3, SCSS, REST API, Git, WebSockets

What did I do:

Developed an interactive web application for a social casino from scratch.

Implemented two-way data exchange with the server via WebSockets to instantly update game balances, bets, and session results without page refreshes.

Developed game interfaces (slot machines/slots, roulette, win animations) using CSS animations, SVG, and Canvas.

Developed client-side data storage logic using Pinia (user profiles, betting history, tournament tables).

Unfortunately, this project's website no longer available.

Period: 2025 - 2026

Job title: Frontend Developer

Place of work: <https://moyabron.ru/>

Stack: Vue (Vue 3, Composition API, Pinia), Vite, TypeScript, Telegram Web Apps API, HTML5, CSS3, SCSS, REST API, Git, WebSockets

What did I do:

Developed the Telegram Mini App: programmed the web app interface within Telegram for searching and booking hotels.

Integrated the frontend with the Telegram API for user authorization, theme management, and calling native messenger components.

Developed logic and created complex interactive forms for searching, filtering, sorting hotels, and online booking modules.

Integrated the API to connect the interface with backend booking services via a REST API.
